

Technical Data Sheet

EP-5 85W-140 Gear Oil₍₁₄₉₀₎

Product Description

A gear oil formulated with highly refined mineral base oils containing a synergistically designed additive technology that will work in extreme conditions. Particularly suited for use in hypoid gears in axles operating under various high speed/low torque and low speeds/high torque conditions.

Application

API GL-5 MIL-L-2105D. Suitable for use in a non-synchronised manual transmissions and hypoid geared axles that require a API GL-5 lubricant.

Outstanding Features

- Good seal compatibility.
- Exceptional oxidation stability.
- Extended transmission and axle life.
- Very high levels of rust and corrosion resistance.
- Superb low and high temperature performance.

Typical Properties

Kinematic Viscosity @ 100°C (mm/s ²) 25	Density @ 15°C: 0.9
Flash Point: >190	Viscosity Index: 98
Pour Point: <-15	Kinematic Viscosity @ 40°C (mm/s ²) 330

PERFORMANCE STANDARDS

Suitable for where the following specifications are required;

API GL-5	MIL-L-2105D
